

TRAINING DEVICES

BECAUSE THERE'S NO ROOM FOR ERROR

PROUDLY SERVING WITH:
NYPD, US Army, Phoenix PD, New Orleans PD, Maricopa County Sheriff's Office, Israeli National Police and over 35 other agencies worldwide

"The best product to come along for the law enforcement community since Taser"
-RTO/Major Metropolitan Police Dept.

"The SF4 has increased the efficiency of our training dramatically. It allows me to concentrate on teaching, instead of looking over each recruit's shoulder searching for violations. The device is a force multiplier."
-Defensive Tactics Instructor

The accidental/negligent discharge of a firearm can destroy lives, careers, and the reputations of officers and agencies. The financial burden placed on the individuals and organizations can be devastating. For every 1,000 officers, a department statistically suffers 1 AD/ND per year. In other words, the law enforcement community has an average of two AD/NDs DAILY in the US alone.

Smart Firearms Training Devices (SFTD) engineers have created a revolutionary training device designed to make negligent discharges a thing of the past. SFTD uses a patented sensor design that detects even the slightest intrusion into the trigger guard setting off an alarm. The device has various timing and algorithm features to allow for proper manipulation of the trigger without setting off the alarm.

When human beings are under stress they revert to gross motor function and primacy. What this means, unfortunately, is bad habits taught early come back to haunt us when they can cause the maximum harm. From the moment a recruit/officer is exposed to our training device, they are building proper muscle memory to avoid an AD/ND.

- Versions available to fit most Glock and S&W M&P Duty Holsters
• Carbine and Shotgun models soon
• One year standard warranty
• Operated by off the shelf batteries
