

FIREARMS ACCIDENT?NOT ON OUR WATCH!

Our training guns are a revolutionary new device designed for INSTRUCTORS. Our guns provide instant feedback using electronic gunshot noises, a patented Accidental Discharge Zone Sensor Alarm in the trigger well, active resetting trigger, night sights, removable magazine, and can be equipped with an optional red or infrared laser. Can be used in conjunction with most laser simulators and laser training products.

No more "BANG, BANG"!

Never again will an instructor need to tell a student to say "bang, bang" while holding a non-functioning piece of rubber. Our training device is the next generation of training gun. Our patented Accidental Discharge Zone Sensor will tell you when a student places their finger on the trigger but is not shooting, encouraging proper finger indexing. Instructors will know when a student has chosen to shoot, or not shoot. The training gun gives instant feedback. No other training gun on the market can do what ours can. Prevents accidental and negligent discharges! Excellent for all Reality-Based Training programs.

LIMITED TIME RED/BLUE GUN TRADE-IN OFFER. EMAIL FOR DETAILS.
