

# Smart Firearms

## AMERICA'S FINEST TRAINING GUN

One of the most dangerous AVOIDABLE situations for an officer to have is a negligent discharge of their firearm. It immediately causes tragic results to the victim, the officer, their career, and to the agency. The threat is directly tied to the effectiveness of an agency's training program and their officers' commitment to the principles of firearms safety. Our training devices are designed for INSTRUCTORS to provide instant feedback using a patented Unintentional Discharge Zone Sensor in the trigger well. An alarm will alert the instructor to an intrusion in the trigger guard when the student is not actively engaged in shooting and encourages the student to self-correct.

## No more "BANG, BANG"!

SMART FIREARMS devices promote effective training. No longer does one have to say "BANG, BANG" while holding an inert piece of rubber that looks like a gun. When the student engages the trigger, the device makes a shot sound and LED indicators show the Instructor who has fired. Instructors will know when a student has chosen to shoot or not shoot, or if they have hesitated, enhancing their Judgmental, Defensive Tactics, De-escalation, and Use Of Force Training. Our training weapons have realistic feel, sound, and function. Red or infrared lasers are optional to further enhance the training. They can be used as stand-alone products, or in conjunction with most laser simulators and systems. **NO OTHER DEVICE** can reduce training scars and unintentional discharges like SMART FIREARMS TRAINING DEVICES.

315 W. Elliott Rd, Suite 107-204, Tempe, AZ 85284
